## Cooler 45

### Technical features

Monopiece structure, made of food-contact-safe material. Absence of joints which make washing and cleaning operations easier.

The handles are built in to avoid any risk of squeezing hands against any external object during the manipulation of the containers.

The silicon gasket can be removed and replaced.

The inner walls have grooves which allow air flow even with a full cooler

Trays can be held in slots which do not overcome the wall, allowing the full use of the inner space of the containers.

All metal parts are strong and easy to maintain, they are screwed to metal plates placed between the walls of each container.

The door slides up to 270 °

The pallet base can be either stainless or galvanized steel.

## Dimensions
